The Evolution Series® Kits
continue to be the market leader
for design and content.

the evolution series®

No matter the industry or location of the workplace, the Evolution Series® will have a first aid kit suitable for your needs. The range provides first aid solutions to handle any hazards that may occur, including general first aid, burns, critical injuries and more.

Our durable kits help businesses maintain workplace safety with confidence, providing lasting value and peace of mind. The range includes:

General workplace first aid kits

Catering first aid kits

Burns first aid kits

Eye wash kits

Biohazard kits

Critical injury bleed control kit

BE READY FOR ANYTHING: ONE SOLUTION, EVERY HAZARD

When risks stack up, your first aid should too. Our modular, colour-coded system makes it simple to cover multiple hazards in one place.

With interlocking wall brackets and customizable case configurations, you can build the exact First Aid Point you need—fast, flexible, and always ready when it counts.

MADE IN THE UK. BUILT FOR THE PLANET

Evolution® cases are proudly manufactured in the UK, cutting down 8.33 tons of CO₂e per year compared to manufacturing overseas. Made from a single piece of polypropylene plastic, every case is 100% recyclable — tough on protection, light on the planet.

Meet the Evolution® first aid case. Engineered with a tough, single-piece construction, they are manufactured right here in the UK, 100% recyclable and built to last. Available in small, medium, and large sizes. Evolution® – cases that stand the test of time.

ENGINEERED FOR THE TOUGHEST CONDITIONS

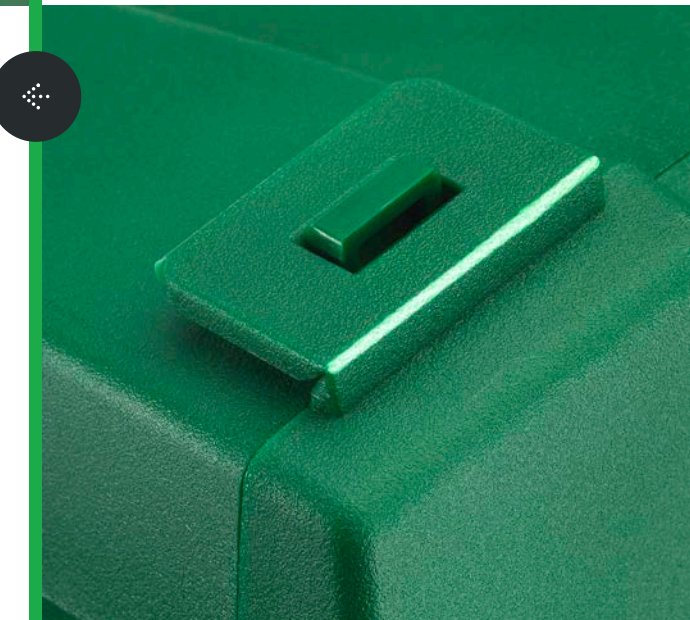

When emergencies happen, your first aid kit should be the last thing you worry about. That's why our cases are engineered with uncompromising strength and durability – to protect essential supplies in any dry environment.

Manufactured from impact-resistant materials, Evolution® cases are built to withstand drops and heavy handling giving you a lifetime of first aid safety. Whether in high pressure kitchens, busy retail centres or industrial units, they hold up under pressure – so your team stays prepared.

SINGLE-PIECE MOULD

Cases are constructed as a single-piece of 100% recyclable polypropylene plastic, so that the whole case can be recycled without the need for deconstructing it to remove metal hinges.

The sleek, seamless design eliminates joints and weak points, making the cases robust and long-lasting and provides better protection against water splashes, spills and dust.

INSPECTION TAGS & TAMPER-PROOF SEALS

The Evolution® cases feature a small hole in the centre of the handle, designed for easy attachment of inspection tags and tamper-proof seals (sold separately).

This simple yet effective design ensures that first aid supplies remain secure and ready for emergencies, while also deterring potential pilfering.

evolution[®] plus

Evolution Plus[®] kits feature the same durable cases, essential contents, and benefits as our standard Evolution[®] kits, but with added enhancements — including wall-mountable brackets, kit-missing labels, and adjustable shelves for greater convenience and organisation.

CLEAN, QUICK, AND READY: A CONVENIENT WORKSTATION WHEN IT COUNTS

When mounted on the wall, the Evolution Plus[®] first aid cases open into an “L” shape, transforming the lid into a convenient workstation for the first aider.

This design allows supplies to be laid out on a clean, accessible surface before beginning treatment, helping to keep the equipment sanitary and saving valuable time in emergency situations.

CUSTOMISABLE SHELVING FOR RAPID ACCESS

All medium and large Evolution Plus[®] kits come with adjustable, removable shelves that are perfect for keeping first aid supplies securely in place.

These shelves help maintain an organised layout, making it easy to quickly locate items, even in urgent situations.

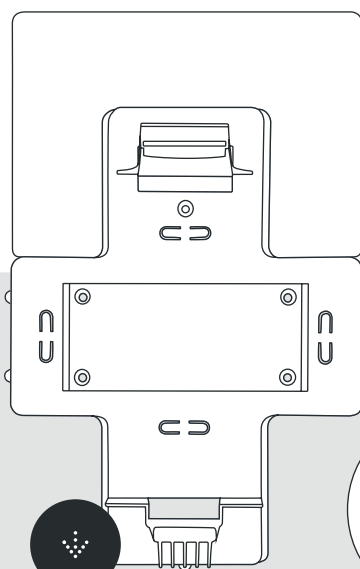

WALL-MOUNTABLE BRACKET & KIT MISSING ALERTS

All Evolution Plus[®] kits come with a wall-mounting bracket, ensuring cases are prominently visible to anyone nearby. This allows the kits to be neatly stored out of the way of daily activities, while still remaining easily accessible in an emergency.

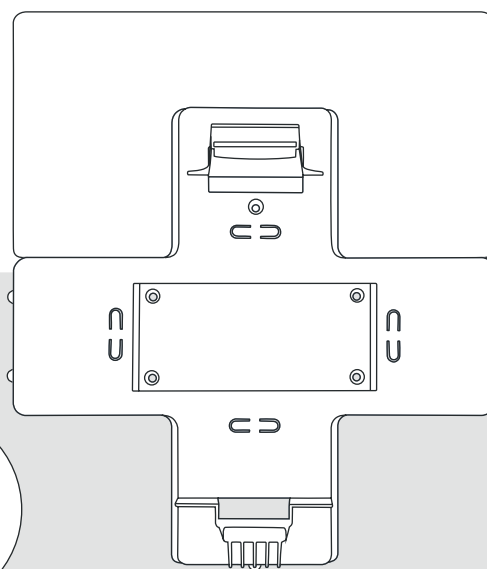

A “Kit Missing” bracket label, provides a clear visual cue when a kit is not in its designated spot. This helps staff quickly identify when a kit needs to be returned or replaced, ensuring readiness at all times.

evolution[®] points

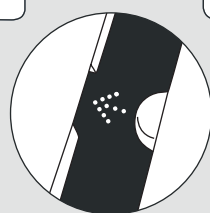

MODULAR CONFIGURATION

Wall-mountable, interlocking brackets let you customise and reconfigure your First Aid Points with ease—perfect for businesses with limited space.

Whether you need to swap cases or adapt to a new layout, you're always in control of how your first aid station is set up.

PHOTOLUMINESCENT HEADERS

The photoluminescent headers on Evolution[®] First Aid Points ensure they're easy to locate — even in darkness or through smoke. Whether clearly visible or partially obstructed, these glow-in-the-dark signs guide the way to critical first aid when it matters most.

SHELVES

Just like Evolution Plus[®] kits, every medium and large Evolution[®] First Aid Point comes complete with adjustable shelves. They help organise and store the case contents, making it easier to quickly identify and access supplies during a first aid emergency.

PRE-CONFIGURED COMBINATIONS

Choose from multiple combinations of Evolution[®] First Aid Points, designed to deliver complete first aid coverage across a wide range of industries. Each unit includes 2, 3, or 4 fully stocked kits, ensuring your team is prepared for any emergency. For specialised needs, the range includes sector-specific First Aid Points, such as a Catering First Aid Point (3 kits tailored for food industry hazards) and an Electrical Shock First Aid Point (2 kits designed for electrical environments). Wherever you work, there's a First Aid Point to match.

evolution[®] kits

GENERAL WORKPLACE FIRST AID KITS

Workplace first aid kits, featuring the classic green Evolution[®] case, come in three sizes and are suitable for a range of businesses, including those providing first aid to off-site employees. These kits are stocked with all the essentials needed to treat minor injuries, such as plasters, bandages and dressings. Ideal for providing basic first aid to minor injuries.

Suitable for all indoor environments.

EYE WASH KITS

Eye wash kits use translucent cases and typically contain emergency sterile eye irrigation for remote treatment where access to tap water is limited, along with various eye dressings. Some of the cases for these kits are supplied with a mirror header to allow for self-administration.

Suitable for workplaces with a high risk of eye injuries such as science labs or construction sites.

BURNS FIRST AID KITS

The Evolution[®] burns kits are available in three sizes, utilising the medium and small red cases. The highly visible burns kits contain supplies which are perfect for providing fast-acting pain relief and treatment to staff and visitors who have suffered a burn in the workplace.

Suitable for catering and hospitality environments, schools, the industrial sector and science labs.

CATERING FIRST AID KITS

Created to meet the legal requirements for the catering industry, Evolution[®] catering kits will provide a comprehensive range of first aid supplies, including blue plasters.

These bold blue kits come in three sizes to provide cover for a variety of businesses ranging from bars to hospitality environments.

Suitable for catering and hospitality sectors.

BLEED CONTROL KIT

Evolution[®] bleed control kit is created with the intention of providing a higher chance of survival to those suffering from catastrophic bleeds. This includes supplies such as tourniquets and trauma dressings.

Suitable for high-risk environments such as the agricultural and industrial sectors and anywhere a kit needs to be available to the public in an emergency.

BIOHAZARD KITS

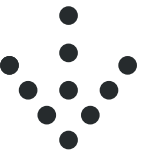

Body fluids pose a serious infection risk and need to be cleaned up quickly and effectively.

Coming in bright yellow cases, these Evolution[®] biohazard kits provide all the equipment needed to eliminate the hazard, such as gloves absorbent powder and disinfectant wipes.

Suitable for schools, medical or chemical environments and commercial cleaning services.

the evolution of evolution®

1981

Safety First Aid acquired by Barbara Froomberg and the business is still owned by the family today

1995

Robert Froomberg appointed new Managing Director

2008

First Evolution® cases designed and manufactured in the UK

2015

Moved to new location in Dunstable, Beds

2022

Moved to Evolution House, current 40,000 sq ft distribution centre in Herts, to support expanding distribution operations and increased capacity requirement

1959

Safety first Aid was incorporated and started trading

1989

Safety First Aid Training division added to the Group following a contract win with the Canary Wharf development in London

1998

Moved to first commercial premises in London allowing distribution scale up

2010

New injection moulding partner appointed to boost production capacity and meet growing demand

2016

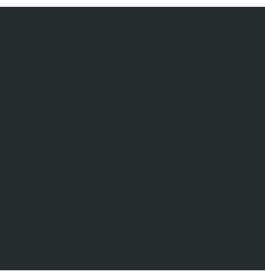

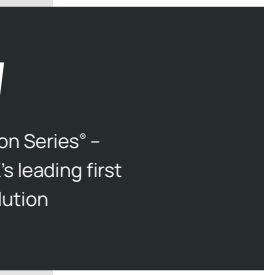

Further expansion of the Evolution Series® range began

2024

All plastic removed from packaging, now made entirely from fully recycled card sourced sustainably

2025

Further manufacturing enhancements made to increase production

NOW

The Evolution Series® – Now the UK's leading first aid case solution

carbon footprint

100%

1

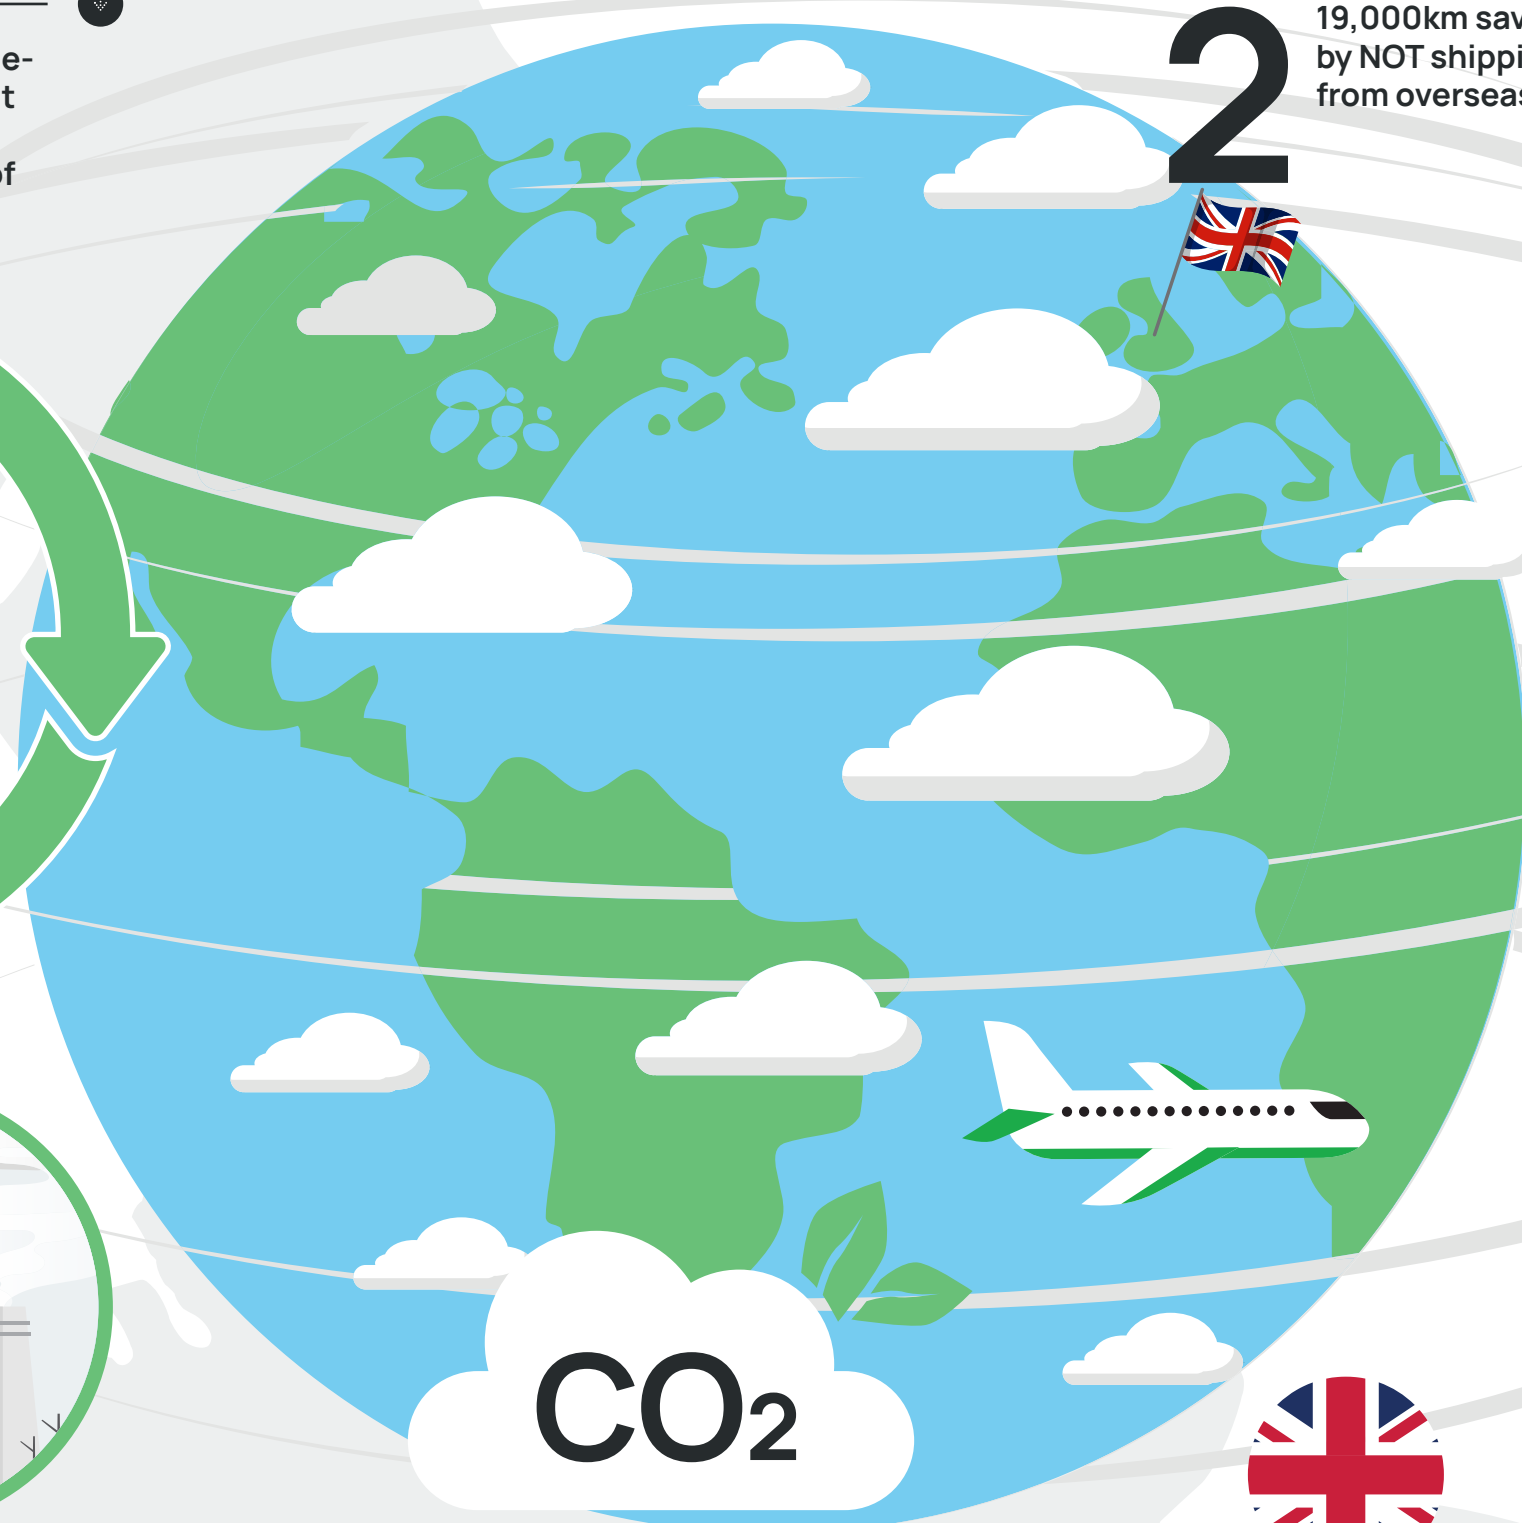

Fully recyclable, single-piece case means unit can go straight for recycling at the end of its life

19,000 km

2

19,000km saved by NOT shipping from overseas

CO₂

90%

3

90% reduction in CO₂e emissions by producing locally in the UK compared to shipping the range across the world

4

This equates to a saving of 8460kg or 8.33 tons in CO₂e per year

5

All whilst supporting UK manufacturing in Great Britain
